Antigua and Barbuda Meteorological Service Climate Section
February 29, 2016

...Higher than normal temperatures...below to near normal rainfall...

Based upon models, observations and subjective inputs, the following are being projected for March to May (spring) 2016 for Antigua with respect to rainfall and temperature:

Rainfall

Below to near normal **rainfall** is likely, with a confidence of 75%. The chance of wetter than normal weather is slight – 25%. The island-average rainfall is unlikely to exceed **264.2 mm** (10.4 in). Probabilistically, there is a

- 25% chance of above normal rainfall;
- 35% chance of near normal rainfall (167.6 to 264.2 mm or 6.6 to 10.4 inches) and
- **40% chance of below normal rainfall.**

Meanwhile, there is equal chance of below normal, near normal or above normal number of **wet days** (days with at least 1 mm or 0.04 in) and **heavy rainfall days**. At and in the vicinity of the V. C. Bird International Airport (VCBIA), the average number of **wet** and **heavy rainfall days** for spring is 23.2 and 5 respectively, based on the climate period 1981-2010.

Temperature

Higher than normal **mean temperature** is expected, with an 85% confidence. The chance of cooler than normal is very slight – 5%. The mean temperature is expected to be greater than **26.6 °C** (79.9 °F). Probabilistically, there is a

- **85% chance of above normal temperature;**
- 10% chance of near normal temperature (26.2 to 26.5 °C or 79.2 to 79.7 °F) and
- 5% chance of below normal temperature.

In addition, it is likely that daytime highs and night-time lows will be higher than normal. At and in the vicinity of the VCBIA, the **mean maximum temperature** is expected to be greater than **29.7 °C** (85.5 °F), with a confidence of 70%, as compared to the 1981-2010 normal of 29.2 to 29.7 °C (84.6 to 85.5 °F). Meanwhile, the **mean minimum temperature** will likely be higher than **23.7 °C** (74.7 °F), with a confidence of 65%, as compared to the 1981-2010 normal of 23.2 to 23.7 °C (73.8 to 74.7 °F).

Definition

The following definitions are being observed based on the 1981 to 2010 (baseline) dataset:

- **Below normal** (less or lower than normal/usual): Values in the lowest 33.3% of the dataset
- **Near normal** (normal or usual): Values in the middle 33.3% of the dataset
- **Above normal** (more or higher than normal/usual): Values in the highest 33.3% of the dataset
